

NEWDAWN G.A.I.G.S.

Social media gave us a voice. GAIGS builds the power to act.

One place to connect, work, decide, fund and prove positive action—starting with your real community.

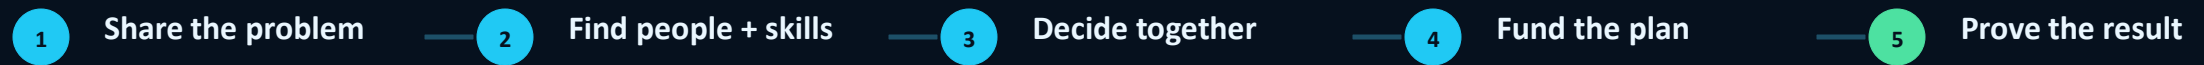

PUBLIC EXPLAINER · WHAT GAIGS IS

Identity → Community → Decision → Funding → Proof

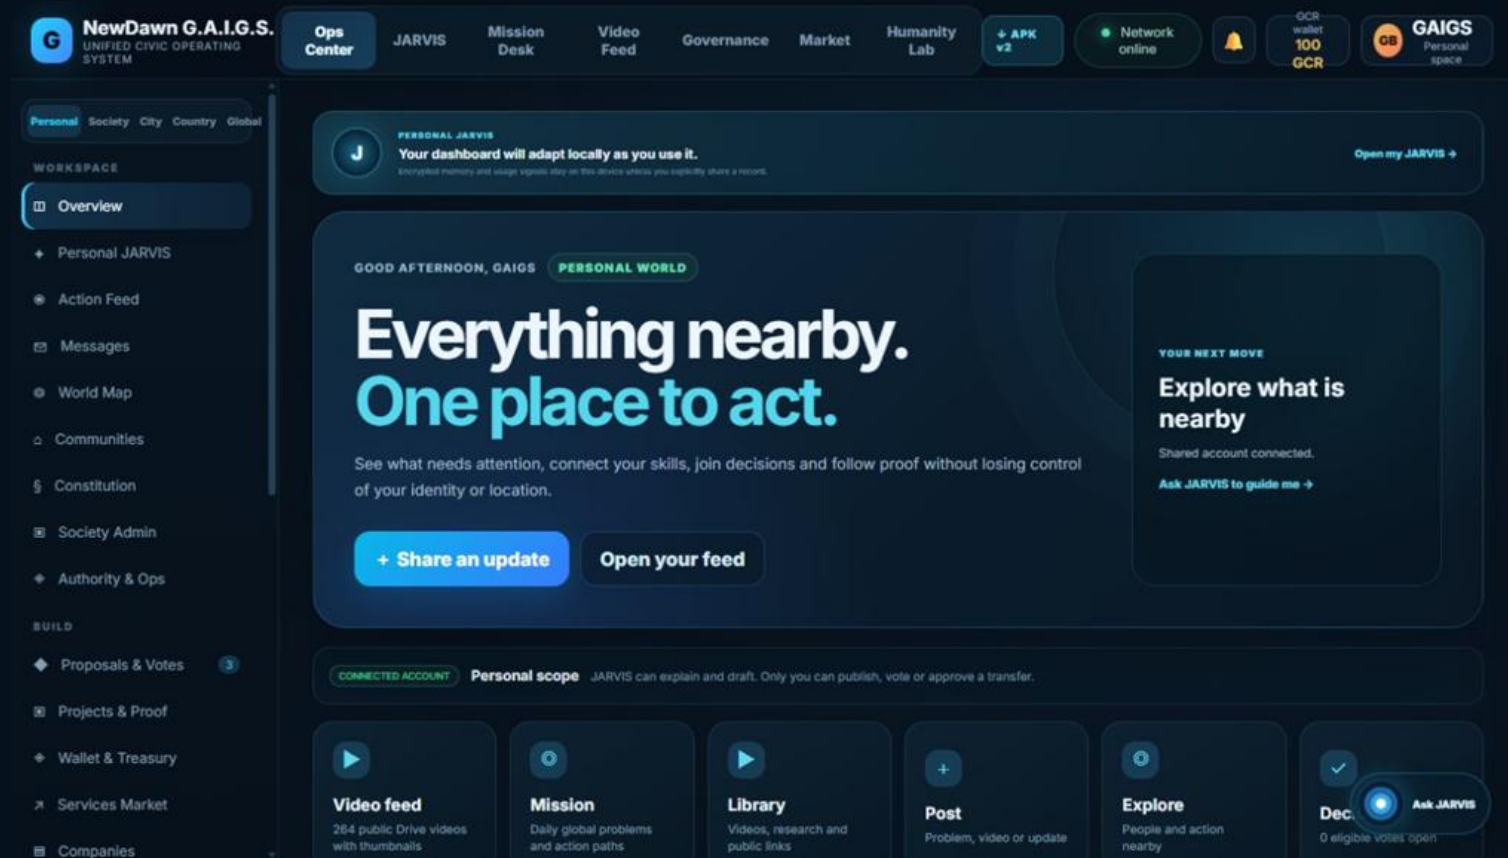

GAIGS is a social action network.

A post should be able to become a plan—not disappear into a feed.

Your identity, location and decisions stay under your control.

Your dashboard begins with what is useful nearby.

COMMUNITY

See nearby societies and local missions.

WORK

Offer skills or ask for a service.

ACTION

Post evidence, vote and follow proof.

Post the real problem—with media, place and evidence.

Text

Photo

Video

Location

Scope

Personal · Society · City · Country · Global

The author chooses who can see the record. Exact location is not public by default.

Turn skills into nearby work—or reach the world.

LOCAL

Food, repair, transport, tailoring

PROFESSIONAL

Design, code, research, consulting

COMPANY

Create a page and receive requests

JARVIS can help match the request. People still agree the terms.

A community decision stays connected to its money and proof.

Admins manage the process—not the people.

Members can inspect, vote and replace bounded roles under the community constitution.

Your wallet is an audit trail before it is a financial product.

100 GCR

welcome platform credits

SHA-256

hash-linked receipts

0

hidden fund movements

Today

Closed-loop credits, member transfers, rewards and project wallets.

Later

Regulated settlement and public-chain anchoring after audit and legal readiness.

Your JARVIS helps everywhere—but never takes your vote.

Explain

What a rule or proposal means

Draft

A post, plan or response

Navigate

Open the right workspace

Remember

Only approved device preferences

YOU APPROVE: publish · vote · transfer

Disaster response deserves its own transparent mission.

Every alert keeps its source, timestamp, location scope and verification state.

Local control can still connect into a global network.

PERSONAL

SOCIETY

CITY

COUNTRY

GLOBAL

A record travels outward only when its purpose and audience require it.

Privacy means control you can see and revoke.

DEVICE

**Local preferences and
offline cache**

SHARED

**Only data needed for
coordination**

PUBLIC

**Rules, decisions and
proofs meant for
inspection**

CNIC is hashed; exact identity documents are not written into public posts or a blockchain.

Humanity Lab will reward useful thinking—not endless scrolling.

A water problem in a mountain village can become a global challenge.

Contribution earns reputation when the evidence survives review.

ROADMAP

The MVP is real—and its limits are visible.

LIVE

Registration · login · profile · avatar · media posts · rewards · GCR wallet · transfers · proposals · votes · project wallet · public web · Android preview

NEXT

Email/KYC provider · encrypted messaging · community eligibility rules · app-store signing

LATER

Public-chain anchoring · regulated money movement · broad peer mesh

Your world. Your decisions. Your power to act.

Open the live platform, create a secure account and help prove one real action from problem to result.
